## Proposed Desired Future Condition(s)

Please be as detailed as possible in describing your proposed DFC. Include the quantifiable value and a description of the method for measuring or calculating the value. Attach additional pages as needed.

Aquifer	Proposed DFC and Measuring/Calculating Method

Aquifer	Proposed DFC and Measuring/Calculating Method

### Consideration of Proposed Desired Future Condition(s)

The Texas Water code requires that the GMA develop DFCs that “provide a balance between the highest practicable level of groundwater production and the conservation, preservation, protection, recharging, and prevention of waste of groundwater and control of subsidence in the management area.” In the space below, or on additional attached pages, please provide your considerations with regard to the nine items that must be considered, per the Texas Water Code, for the proposed DFC(s).

**Consideration 1 – “Aquifer uses or conditions within the management area, including conditions that differ substantially from one geographic area to another:”** \_\_\_\_\_

---

---

---

---

---

---

---

**Consideration 2 – “The water supply needs and water management strategies included in the state water plan:”** \_\_\_\_\_

---

---

---

---

---

---

---

---

---

---

**Consideration 3 – “Hydrological conditions, including for each aquifer in the management area the total estimated recoverable storage as provided by the executive administrator, and the average annual recharge, inflows, and discharge:”** \_\_\_\_\_

---

---

---

---

---

---

---

---

---

---

**Consideration 4 – “Other environmental impacts, including impacts on spring flow and other interactions between groundwater and surface water:”** \_\_\_\_\_

---

---

---

---

---

---

---

---

---

---

**Consideration 5 – “The impact on subsidence:”** \_\_\_\_\_

---

---

---

---

---

---

---

---

---

---

**Consideration 6 – “Socioeconomic impacts reasonably expected to occur:”** \_\_\_\_\_

---

---

---

---

---

---

---

---

---

---

**Consideration 7 – “The impact on the interests and rights in private property, including ownership and the rights of management area landowners and their lessees and assigns in groundwater:”** \_\_\_\_\_

---

---

---

---

---

---

---

---

---

---

**Consideration 8 – “The feasibility of achieving the desired future condition:” \_\_\_\_\_**

---

---

---

---

---

---

---

---

**Consideration 9 – “Any other information relevant to the specific desired future conditions:” \_\_\_\_\_**

---

---

---

---

---
